

```
import java.util.Scanner;
public class ConcanateString
{
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.println("Enter first string: ");
        String str1 = sc.nextLine();
        System.out.println("Enter second string: ");

        String str2 = sc.nextLine();
        System.out.println("Concatenated string: "+(str1+str2));
    }
}
```
